

The City of Paterson Awards Contract to Excel for Implementation of the Preliminary Assessment and Site Investigation of the Former Leader Dye & Finishing Facility

In February 2002, The City of Paterson awarded Excel the contract to conduct a Preliminary Assessment and Site Investigation (PA/SI) at the Former Leader Dye & Finishing site, an abandoned textile plant that occupies a full city block. The PA/SI will be conducted under a grant from the Hazardous Discharge Site Remediation Fund (HDSRF) program that is being obtained by Excel on behalf of the City. The PA/SI represents the initial step in the City's aggressive plans for redevelopment of this Brownfield property. The PA/SI will be initiated upon completion of the HDSRF grant processing anticipated for the spring of this year.
