

Excel Wins the USEPA Brownfields Pilot Program Contract for Middlesex County, New Jersey

The Middlesex County Improvement Authority (MCIA) awarded the engineering and environmental service contract to Excel for the performance of Preliminary Assessments at select properties identified by the MCIA for evaluation under the Middlesex County Brownfields Demonstration Pilot Program. Excel has completed six PAs for Brownfield properties located in South Amboy in support of a waterfront redevelopment project that has since been initiated. Excel also designed the work scope for performance of the Site Investigation phase of work for the South Amboy properties and provided technical consultation regarding integration of remedial action alternatives into the redevelopment plans. Excel is working with the MCIA and the City of Perth Amboy to select Brownfield properties that will be targeted for the performance of PAs in the summer of 2002.
